

## European Research Projects

EldyLAB is involved in several European and International Projects in collaboration with the most important partner in the field of ageing and disability.

**VALUE AGEING** Project, funded within the scope of the Seventh Framework Programme (FP7) of the European Commission. VALUE AGEING aims to foster cooperation between non-commercial and commercial entities on a joint research project about the incorporation of Fundamental Values of the European Union in Info-Communication Technology (ICT) for Ageing. Good technology is not just about making something better; it is about doing something different and consequently making people think differently ([www.valueageing.eu](http://www.valueageing.eu)).

Eldy LAB is involved in **BASE Project** (Base English for Deaf Adults) with other 5 European Partner, whose aim is create a e-learning platform for Deaf using the Eldy platform. Dissemination of user friendly technology for senior and impaired is an important issue.
